

500 access switches

Overview

The 500 Series Industrial Ethernet Switches support high speed layer 2 switching between ports. The 508TX (516TX)(524TX) is an affordable 8 (16)(24) port switch that is capable of auto negotiating 10/100 Mb and half/full duplex communications. It is a new generation smart managed switch designed for network environments that require high performance, high port density, and easy installation. In enterprise networks, it can be used as an. de explains how to configure a Catalyst Express 500 switch for the first time. If you are using a pop-up blocker, make sure it is disabled. With a maximum real-world aggregate data rate of 1. 49 Gbps (HE80/HE20), they deliver the speed and reliability needed for venues. The Cisco® 500 Series Stackable Managed Switches are a new line of stackable managed Ethernet switches that provide the advanced capabilities you need to support a more demanding network environment, at an affordable price.
