

6-port fiber optic terminal box self-operated

Overview

The HTB8004 6-Port Fiber Optic Distribution Box is a reliable and space-saving solution for fiber termination and distribution in FTTH and telecom networks. Designed with a strong ABS housing, it protects fibers from environmental impact while ensuring organized cable routing. Compliant with IEC, TIA/EIA & RoHS standards. Optical distribution box as the most advanced FTTX network distribution node equipment, provide quick and reliable connection, good protection and management for the FTTX network. Advanced structure design, Small size and reasonable structure. Material: PC+ABS, high strength engineering plastics. Built from UV-resistant ABS material, the box combines durability with a sleek form factor, making. The MEXFOSERV® Fiber Optic Terminal Boxes, also known as Network Interface Device (NID) which are typically used as a transition point where the OSP cable is spliced to an indoor cable. This UV resistance housing is designed for wall mount applications to provide protection for fiber optic. 6 Port Fiber Optic Distribution Box FDB06A is made of high quality engineering plastic,with beautiful and elegant appearance,it is usually installed at outdoor walls. The MAX capacity is 6,the splice tray adopt.
