

600 Cable Tray Price

AI Overview

The price of 600mm cable trays varies widely depending on material, length, and supplier, typically ranging from \$30 to \$150 per standard section. Pricing Overview Hot-dip galvanized steel trays (standard ladder type, 2.4–3 meters long) generally cost \$30–\$80 per tray for standard lengths, with fittings priced separately per piece. Heavy-duty 600mm trays made from hot-dipped galvanized (HDG) steel for industrial or outdoor use can cost \$100–\$150 per 3-meter section, depending on bulk orders and customization. Aluminum or stainless steel trays are usually more expensive due to material costs, with prices often starting around \$80–\$120 per tray and increasing for thicker or longer sections. Customizable options such as powder coating, special hole geometry, or non-standard lengths may add to the cost, but enhance durability and installation flexibility. Factors Affecting Price Material: Galvanized steel is cheaper than stainless steel or aluminum. Length: Standard lengths are 2.4–3 meters; longer sections increase cost. Load capacity: Heavy-duty trays designed for industrial applications are priced higher. Bulk orders: Many suppliers offer discounts for large quantities. Fittings and accessories: Elbows, tees, and supports are priced separately. Supplier Notes Suppliers like NewReach and Alibaba vendors provide customizable 600mm trays suitable for indoor and outdoor use, with options for powder coating and special designs. UK suppliers such as DirectChannel offer fast delivery for heavy-duty HDG trays, with trade pricing available for bulk orders. Price lists for standard hot-dip galvanized ladder trays are available online, providing a baseline for budgeting. For an accurate quote, it is recommended to contact suppliers directly, specifying material, length, quantity, and any customization requirements. This ensures pricing reflects current market rates and shipping costs.
