

A list of prices for aerial optical cables

AI Overview

Aerial optical cables typically range from \$0.10 to \$6 per foot, depending on fiber type, strand count, and construction. General Pricing The cost of aerial fiber optic cables varies widely based on specifications and application: Single-mode fiber: \$0.10 to \$0.50 per foot for standard cables, suitable for long-distance transmission . Multimode fiber: \$0.30 to \$1.00 per foot, generally used for shorter distances . High strand-count cables: For example, a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot . Specialized constructions: Armored or all-dielectric self-supporting (ADSS) cables designed for aerial installation can range from \$0.50 to \$5 per foot, depending on environmental durability and mechanical strength . Factors Affecting Price Fiber Count and Type: More strands and higher-quality glass fibers increase cost. Cable Construction: Lightweight aerial drop cables, ADSS cables, and double-sheath designs have different price points . Installation Considerations: Aerial installation is generally less expensive than underground deployment, but long spans or integration with power lines may affect cost . Bulk Purchases: Buying in bulk can reduce per-foot costs, while pre-terminated assemblies or patch cables are more expensive due to factory termination . Typical Applications ADSS cables: Self-supporting between poles without metal elements, suitable for power line corridors up to 11kV . Aerial drop cables: Lightweight options for mid- to long-span aerial runs, often used in FTTH or network backbone connections . Summary For planning purposes, expect aerial optical cables to cost between \$0.10 and \$6 per foot, with most standard single-mode or multimode aerial cables falling in the \$0.10–\$1.50 per foot range. Prices increase for higher strand counts, armored construction, or pre-terminated assemblies, and installation method and environmental requirements can further influence total project costs .
