

ASEAN Explosion-proof Distribution Box Function

Overview

Explosion-proof distribution boxes are designed to safely control and distribute electrical power in hazardous environments, preventing ignition risks. These boxes offer ample wiring space and boast an IP65 protection level, making them With. Flameproof enclosure (Ex d IIB+H2), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc.) ·Enclosure: stainless steel. Its robust construction ensures reliable operation in explosive atmospheres, such as those found in oil, gas, and chemical. Options range from Ex d (flameproof enclosure) to Ex e (increased safety) and Ex i (intrinsically safe) right through to Ex p (pressurized housing), as well as combinations of different explosion-protection types – always bearing in mind the most efficient solution for your application.
