

Cable tray turned outwards at 90 degrees

Overview

A wire mesh cable tray vertical outside bend is a fitting used to change the direction of a wire mesh cable tray system vertically, typically at a 90-degree angle, directing cables outward. This component is ideal for installations where vertical transitions are required while maintaining the. I'm using cable tray for this, and have created custom families, and a script that swaps out cable tray straights for a custom family I've made. Most of this works fine, however, I've found that if I try and draw cable tray, and set an elbow other than one of the defaults, they don't draw at angles. 90° bend, Vertical Outer Bend, for all cable tray types of 50 mm side height. Including appropriate fastening material. ASP 90° Cable Trays offers a 24" bend radius for ease of coax installation and are available in standard depth of 4" with optional depth of 6". Easily connects to the property of Advanced Support Products, Inc. The total tray section consumed = 2 × single bend length.
