

China Unicom gigabit fiber optic cable

Overview

China Unicom is rolling out 10G-GPON fixed-line access to support multi-gigabit home broadband and enterprise services in key Chinese cities. The upgrade builds on its nationwide FTTH footprint and aims at 10 Gbit/s-class downlink for advanced streaming, gaming and industrial use cases. Edited by. Sunan County, Hebei Province, China--Chinese telecom heavyweight Huawei and state-run operator China Unicom had launched a commercial 10-Gigabit (10G) broadband network in Sunan County, Hebei Province, marking a significant development in next-generation internet infrastructure; real-world tests. iples of moderate advancement, scientific planning, and coordinated development. It is a wired network Which is completely different from the wireless mobile network and uses. Fiber now underpins nearly all fixed broadband in China – With 99% of lines on fiber, operators and policymakers rely on it as the backbone for gigabit services, smart cities and national digitalization efforts. Next-gen fiber helps stabilize ARPU amid saturation – Multi-gigabit tiers, smart-home. Recently, the first new global carrier “Large Effective Area Fiber” (LEAF) (ITU-T standard code G. E) fibre cable land application engineering project whose application test was participated in by Yangtze optical fibre and Cable Joint Stock Limited Company (Stock Code: 6869).
