

Columbia ADSS optical cable 24 cores

Overview

This specification covers the construction all dielectric self-supporting Optical Fiber Cable (ADSS) properties for outdoor application. The optical fiber cable contains 24 cores (6cores/tube) single mode ITU-T G. Then, two layers of aramid fibers are twisted bidirectionally for reinforcement, and finally a polyethylene outer sheath or an electric tracking. The ADSS Cable 24 Core stands out as a premier solution, combining cutting-edge design with unmatched durability to meet modern connectivity demands. We offer a wide range of options, from 6 fibers to 144 fibers, all the way up to 432 fibers and even 6904 fibers, which are. The aerial fiber optic solution most commonly used in medium to long-distance telecom and power utility networks is the 24-core ADSS optical fiber cable, which operates in an all-dielectric system with self-supporting design. This cable is ideal for high-bandwidth.
