

Cost of Fireproof Cable Trays in Southern Europe

AI Overview

Ordinary fireproof cable trays in Southern Europe typically range from €25 to €80 per meter, depending on material, fire rating, and supplier. Price Overview The cost of fireproof cable trays varies based on material (steel, stainless steel, or halogen-free plastic), fire resistance rating, and tray type (perforated, ladder, or basket). Standard low-voltage fireproof trays for indoor use generally start around €25–€35 per meter, while higher-rated or heavy-duty trays for industrial or outdoor applications can reach €60–€80 per meter (Cablofil, Eurostrut, Trayco). Custom sizes, integrated ends, or specialized coatings may increase the price further. Factors Affecting Cost Material: Hot-dip galvanized steel is common and moderately priced; stainless steel or corrosion-resistant coatings increase cost. Fire Rating: Trays tested to DIN 4102-12 or equivalent standards for 30–90 minutes of fire resistance are more expensive due to testing and certification requirements. Design and Load Capacity: Ladder-type trays for heavy power cables or trays with integrated ends for faster assembly may cost more. Supplier and Region: Prices vary across Southern Europe (Italy, Spain, Portugal, Greece) due to shipping, local taxes, and supplier policies. Purchasing Tips Request Quotes: Most suppliers like Eurostrut and Trayco provide quotes via their websites or sales teams. Compare Specifications: Ensure the tray meets your fire resistance, load, and environmental requirements. Consider Bulk Orders: Larger orders often reduce per-meter cost. Check Standards Compliance: Verify compliance with DIN EN 61537 or equivalent European standards for cable support systems. In summary, for ordinary fireproof cable trays in Southern Europe, expect a price range of €25–€80 per meter, with the final cost influenced by material, fire rating, design, and supplier. Contacting local distributors for exact quotes is recommended to account for region...
