

Custom-made large-span bridge in Paraguay

Overview

Puente Héroes del Chaco will feature two lanes in each direction, along with a bike path and a pedestrian sidewalk, spanning a width of 28. The construction timeline is projected to last 36 months. Upon completion, this bridge will alleviate congestion on the Remanso. The Héroes del Chaco Bridge (Spanish: Puente Héroes del Chaco) is a cable-stayed bridge in Paraguay that connects the city of Asunción and Nueva Asunción. It was built to help decongest the Remanso. The bridge marks the first link between the capital city and the Western Region, paving the way for significant development along the Paraguay River. There has been steady population growth in and around Paraguay's capital over a number of years and. dream come true for the region that has been 40 years in the making. The long-awaited second connection between the two countrie has a main span of 470 m, making it the longest in Latin America. A project of this size required suitably large expansion joints, whic i is an asymmetric cable-stayed.
