

Digital Wiring Unit 20 System

Overview

20 I/O Modules are input/output modules for substation automation and SCADA RTU applications. They have stood the test of time, continue to be widely used, and are extremely reliable. Below you will find brief information for D20 D20ME, D20 D20ME II, D200 D20ME, D200 D20ME II. These remote terminal units (RTUs) are designed to collect data from various sources, perform calculations, and communicate with other systems. Connecting to G100, G500, D400 (with D. Advanced soft-ware programming knowledge should be obtained) facilitates installation. Controls may emit some mechanical noise. Take this into account when cable with four twisted. Ready to ship from 05/21/2026 if you order today. (AWG) Wire cross-section, solid, max.
