

EU Metal Long-Span Cable Tray Prices

AI Overview

Metal long-span cable trays in the EU typically range from €50 to €250 per meter, depending on material, load capacity, and design.

Price Overview

The cost of long-span metal cable trays varies widely based on several factors:

- Material:** Hot-dip galvanized steel is generally the most common and cost-effective, while stainless steel trays are more expensive due to corrosion resistance and durability. Wire mesh long-span trays may fall in between, offering flexibility and lighter weight.
- Tray Type and Design:** Solid-bottom, perforated, or ladder-style trays influence price. Ladder trays for heavy power cables are typically more expensive than perforated trays for data or control cables.
- Load Capacity and Span:** Long-span trays designed to carry heavier loads or cover longer unsupported distances require thicker metal and reinforced structures, increasing cost.
- Finish and Coating:** Powder-coated or halogen-free finishes add to the price, especially for outdoor or industrial environments.

Typical Price Ranges

- Standard galvanized steel long-span trays: €50–€120 per meter
- Stainless steel long-span trays: €150–€250 per meter
- Wire mesh long-span trays: €80–€180 per meter

These ranges are indicative; actual prices depend on supplier, quantity, and project-specific requirements. Bulk orders or custom sizes may reduce per-meter costs.

Suppliers and Ordering

Several EU suppliers provide long-span cable trays:

- Ekabel24:** Offers hot-dip galvanized and stainless steel trays compliant with DIN EN 61537 standards, suitable for industrial and commercial installations.
- Eurostrut:** Provides a variety of widths, heights, and configurations, including NATO-type and distribution trays, with quotes available via their webshop.
- BAKS:** Specializes in wire mesh and ladder systems, with online tools for load simulation, cable filling, and cost estimation.
- ELMARK and CEF:** Offer extensive catalogues of steel cable trays for industrial and commercial projects, with options for heavy-duty long-span installations.
