

Fiber Optic Dedicated Router AC6

AI Overview

The Tenda AC6 is a dual-band AC1200 router optimized for fiber optic connections, offering speeds up to 1167 Mbps with advanced Wi-Fi technologies for stable home networking. Key Specifications and Performance The Tenda AC6 supports dual-band Wi-Fi with speeds of 867 Mbps on 5 GHz and 300 Mbps on 2.4 GHz, totaling 1200 Mbps, making it suitable for HD streaming, online gaming, and multiple device connections simultaneously. It features four high-gain antennas powered by multi-oscillator radiation technology and Beamforming+, which focuses the Wi-Fi signal toward connected devices for improved coverage and reduced interference. The router is equipped with a 28nm CPU for stable performance across your home network. Fiber Optic Compatibility The AC6 is compatible with fiber optic internet through its WAN port and supports PPPoE username and password migration, allowing easy replacement of older routers without reconfiguring ISP credentials. It is important to note that the AC6 is a router, not a modem, so a separate fiber modem or ONT provided by your ISP is required. Features MU-MIMO technology: Communicates with multiple devices simultaneously for faster connections. QoS (Quality of Service): Prioritizes bandwidth for gaming, streaming, or other high-demand applications. WPA3 encryption: Ensures secure wireless connections. Tenda Wi-Fi App: Allows easy setup, network monitoring, parental controls, and scheduling. Access Point and Repeater Modes: Extend or convert wired connections to wireless networks for flexible home coverage. Practical Considerations The AC6 is ideal for small to medium-sized homes, providing reliable coverage and stable speeds for multiple devices. Its setup is user-friendly, especially for fiber users, as it can replicate existing PPPoE credentials from an old router, reducing configuration complexity. The router also supports smart home integration via Tenda SP3 Wi-Fi plugs and voice control with Alexa or Google Assistant. Summary The Tenda AC6 AC1200 is a cost-effective, fiber...
