

How long is the Huijue fireproof cable tray

AI Overview

The Huijue (Huapeng) fireproof cable tray is available in lengths starting from 1 meter, with custom lengths possible upon request. Huijue fireproof cable trays, also referred to as Huapeng cable trays, are made of carbon steel with a 1.0 mm thickness and are designed for fire-resistant cable installation. The minimum length per section is 1 meter, but the manufacturer can provide custom lengths depending on project requirements, which is common in industrial cable tray systems to accommodate specific routing and installation needs.

Additional Specifications

- Material:** Carbon steel with fireproof coating
- Side Rail Height:** 50 mm
- Cable Capacity:** 12-25 cables per tray
- Maximum Working Load:** 100-300 kg
- Surface Finish:** Fireproofing coating
- Delivery:** In-stock items ship within 2-5 days; larger orders may take 5-15 days

Installation Considerations

For fireproof cable trays like Huijue, it is important to maintain proper support spacing, alignment, and fireproof sealing at wall or floor penetrations. Perforated or mesh designs are often used to improve heat dissipation and prevent cable overheating.

Customization

Many manufacturers, including Huijue, offer non-standard lengths and configurations to suit specific installation layouts, which allows for flexibility in industrial, commercial, or utility projects. In summary, while the standard section length is 1 meter, Huijue fireproof cable trays can be customized to longer lengths to meet project-specific requirements, ensuring both fire safety and installation efficiency.
