

How much does a meter of mesh cable tray cost in the Bahamas

AI Overview

Wire mesh cable trays in the Bahamas typically cost between \$2 and \$25 per meter, depending on material, size, and installation requirements.

Price Range and Factors

The cost of a wire mesh cable tray depends on several factors:

- Material:** Steel is the most common and affordable, while stainless steel and aluminum are more expensive due to corrosion resistance and lightweight properties.
- Type and Size:** Wire mesh trays are generally cheaper than ladder or perforated trays and are ideal for lightweight cabling, such as internet or data cables.
- Surface Finish:** Pre-galvanized trays are the most economical, suitable for dry indoor areas, while hot-dip galvanized or powder-coated trays are better for outdoor or humid environments but cost more.
- Installation Costs:** Labor, supports, connectors, and brackets can significantly affect the total cost. Wire mesh trays are lighter and easier to install, reducing labor expenses compared to heavier steel or ladder trays.
- Shipping and Local Market:** Importing trays to the Bahamas may increase costs due to shipping and local handling fees.
- Local Suppliers:** In the Bahamas, suppliers like Jeetmull Jaichandlall are recognized for providing wire mesh cable trays. They emphasize affordability, durability, and ease of installation, and can offer guidance on bulk orders or project-specific pricing. Contacting local suppliers directly is recommended to obtain precise quotes, including shipping and installation.

Cost Summary

- Wire mesh tray (basic steel, per meter): \$2–\$10
- Aluminum or coated steel (per meter): \$10–\$25
- Installation and accessories: Additional, depending on complexity and labor rates

Wire mesh trays are generally cost-effective, especially for data centers, offices, or projects with frequent layout changes, as they reduce installation time and maintenance costs. For accurate budgeting in the Bahamas, it is best to request a detailed quote from local...
