

How much does an 88r fiber optic fusion splicer cost

AI Overview

The Fujikura FSM-88R fusion splicer typically costs between \$8,000 and \$15,000, depending on supplier, included accessories, and warranty options. The Fujikura FSM-88R is a professional ribbon fiber fusion splicer designed for high-density environments such as data centers, telecom backbones, and FTTx deployments. Its price is influenced by several factors:

1. **Supplier and Region:** Prices vary depending on whether the splicer is purchased from OEM suppliers in China, the UAE, or local distributors. Some suppliers offer bundled packages including cleavers, electrodes, battery packs, and carrying cases, which can increase the total cost.
2. **Accessories and Consumables:** The FSM-88R often comes with the CT-50 fiber cleaver, electrodes, and protection sleeves. Replacement electrodes and cleaver blades are consumables that add to operational costs over time.
3. **Warranty and Support:** Standard warranties are typically 1 year, but extended warranties or service contracts can increase the upfront cost. Suppliers with rapid technical support and training programs may charge a premium.
4. **Technology and Features:** The 88R is a ribbon fiber splicer capable of handling up to 12 cores simultaneously. While it does not perform core alignment, it uses tension analysis and arc brightness control to reduce fiber deviation, which positions it in the mid-to-high price range of professional splicers.
5. **General Fusion Splicer Pricing Context:** Professional fusion splicers range from \$3,000 to \$30,000, with high-end models featuring automated core alignment, advanced software, and multi-fiber splicing capabilities commanding the higher end of the spectrum.

In summary, for a new Fujikura FSM-88R, expect to pay approximately \$8,000–\$15,000, with the final price depending on the supplier, included accessories, warranty, and shipping options. This investment ensures relia...
