

How much does the MXPD-243 optical module cost

AI Overview

The MXPD-243 optical module typically ranges from approximately \$50 to \$120 depending on the seller, condition, and shipping options. The MXPD-243S is a 1.25G 1310nm single-mode SFP optical module with a 10 km transmission range, commonly used in networking equipment for gigabit connections. Pricing varies across online marketplaces: Amazon lists the MXPD-243S but does not display a fixed price; prices may fluctuate based on seller and availability. eBay shows trending prices over the last 90 days, generally falling in the \$50-\$120 range, with free shipping often included. Digi-Key and other electronics distributors like Re-spareparts offer the module for industrial or general-purpose use, but exact prices are typically provided upon request or during checkout. Factors affecting cost include whether the module is new or refurbished, the seller's location, and shipping fees. For the most accurate and up-to-date price, it is recommended to check multiple online retailers or contact distributors directly.
