

How to assign a serial number to an ODF reel for power optical cables

Overview

2 Serial Number The serial number is assigned by the owner of the reel and must not be duplicated on another reel with the same owner code. Table 20-3 shows information on both sides of labels attached to an optical fiber between a device and an optical distribution frame (ODF). Numbered in top-down and left-right order starting from 01. The serial number is composed of six alphanumeric. The most efficient labeling system for fiber optic cables comprise these key components: The cable identifier: An alphanumeric code that differentiates this cable from other cables within your facility. Each type. If after entering your serial number you see the screen to the right: When keying in a serial number that begins with "S#", DROP the prefix "S#".
