

Industrial-grade managed switch GSD

Overview

Our industrial-grade managed Ethernet switches, with redundant ring technology, reliably support the largest amounts of real-time data in the market. Managed switches protect your mission-critical applications from network interruptions or temporary malfunctions with Fast. Moxa's Layer 2 managed switches feature industrial-grade reliability, network redundancy, and security features based on the IEC 62443 standard. This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. The ISM5012D is a managed industrial Ethernet switch designed to meet industrial application scenarios in power, transportation, industrial control and other harsh environments. The ISM series can operate in an extreme environment of -40~+85°C.
