

Intelligent PDU Network Remote Control

15a

Overview

This intelligent PDU provides 8 rear-facing NEMA 5-15R outlets and delivers 15 amps 125V capacity AC power distribution to multiple devices within a data center or server room. The ENVIROMUX Intelligent Power Distribution Control Units allow you to remotely reboot and control power (on/off) to servers and network devices, and monitor voltage and current. 15A · 120VAC · Switched & Metered-by-Outlet Intelligent Rack PDU The SPDU Series delivers outlet-level control and power visibility for rack-based infrastructure -. The PE6108 eco PDU is intelligent PDU s that contains 8 AC outlets and is available in various IEC or NEMA socket configurations. It provides secure, centralized, intelligent, power management (power on, off, cycle) of data center IT equipment (servers, storage systems, KVM switches, network. High Accuracy Measurement - The industrial grade switched PDU adopts high-precision sampling circuit which can accurately measure voltage and amperage etc., the fault tolerance is less than 0. Equipped with Multi-function Ports - The 1U PDU provides 2 RJ45 and 2 RJ11 ports. When you need to reduce costly site visits, ensure business continuity and increase network reliability, iBoot-PDU series gives you peace of mind. iBoot-PDU4A-N15, a web-accessible, managed PDU with independently controlled outlets, enables multiple users to reboot remotely from anywhere, using any.
