

List of Cable Tray Supports

AI Overview

Cable tray supports include wall-mounted brackets, ceiling-hung hangers, floor-mounted supports, and cantilever brackets, designed to securely hold cable trays in various environments.

Common Types of Cable Tray Supports

- 1. Wall-Mounted Brackets** These supports attach directly to walls and provide lateral support for cable trays. They are ideal for routing trays along vertical surfaces and can accommodate horizontal bends or T-junctions in the tray system.
- 2. Ceiling-Hung Hangers** Suspended from ceilings, these hangers support cable trays in open spaces, allowing for overhead routing. They are often adjustable in height and can include threaded rods, clamps, or trapeze-style hangers for multiple tray runs.
- 3. Floor-Mounted Supports** Used when ceiling or wall mounting is not feasible, floor-mounted supports provide stable base support for cable trays. They are suitable for heavy cable loads and long horizontal runs, often incorporating base plates or pedestals.
- 4. Cantilever Brackets** Cantilever supports extend from a wall or structural beam to hold trays without additional vertical supports. They are useful for short tray runs or when space constraints prevent floor or ceiling mounting.
- 5. Center Suspensions** These supports are installed beneath the tray at intervals to prevent sagging in long runs. They are commonly used with ladder or mesh trays to maintain structural integrity and proper cable spacing.
- 6. Mounting Plates and Accessories** Mounting plates attach junction boxes, devices, or additional equipment to the tray system. Accessories such as barrier strips, covers, and cable protection rings enhance safety and organization.

Material Considerations Cable tray supports are typically made from steel, stainless steel, or aluminum, with options for hot-dip galvanization, epoxy coating, or other corrosion-resistant finishes. Material selection depends on environmental conditions, load requirements, and compliance with standards.

Compliance and Standards Supports should comply with IEC 61537, NEMA VE 2, and NEC standards t...
