

Long Concealed Distribution Box

AI Overview

A Long Concealed Distribution Box is a flush-mounted electrical enclosure designed to house multiple circuit breakers and electrical components discreetly within walls, offering both safety and aesthetic integration.

Overview A concealed distribution box is an electrical enclosure used to manage and distribute power safely across multiple circuits while remaining hidden within walls or architectural elements. These boxes are essential in modern residential, commercial, and industrial buildings, providing a clean, organized, and secure solution for electrical infrastructure. Long versions of these boxes are typically designed to accommodate a higher number of circuit breakers (MCBs) or RCDs, making them suitable for larger installations or complex electrical systems.

Key Features

- Flush-Mount Design:** Fits seamlessly into walls, maintaining interior aesthetics.
- Capacity:** Available in various sizes, such as 20P-40P, 42P-60P, and above 60P, allowing for extensive circuit management.
- Material Options:** Constructed from durable metal or high-strength plastic, often with rust-resistant or weatherproof finishes.
- Safety Compliance:** Supports MCBs, RCDs, and surge protection devices, ensuring protection against overloads, short circuits, and voltage spikes.
- IP Ratings:** Commonly IP54 or IP65, providing protection against dust and water ingress.
- Smart Integration:** Some models support remote monitoring and energy management systems, aligning with smart home or industrial automation trends.

Applications

- Residential Buildings:** For housing multiple circuits in apartments or large homes while maintaining interior aesthetics.
- Commercial Premises:** Offices, retail spaces, and data centers benefit from organized and concealed power distribution.
- Industrial Facilities:** Factories, solar power systems, and utility infrastructure use long concealed boxes for complex electrical networks.
