

Low Loss Silicon Photonics Technology

Overview

In this paper, we present a review of our recent progress in upgrading an unconventional silicon photonics platform towards such goal, including ultra-low propagation losses, low fibre coupling losses, integration of superconducting elements, Faraday rotators, fast and. In this paper, we present a review of our recent progress in upgrading an unconventional silicon photonics platform towards such goal, including ultra-low propagation losses, low fibre coupling losses, integration of superconducting elements, Faraday rotators, fast and. EPFL scientists have developed ultralow-loss silicon nitride integrated circuits that are central for many photonic devices, such as chip-scale frequency combs, narrow-linewidth lasers, coherent LiDAR, and neuromorphic computing. Encoding information into light, and transmitting it through optical. Photonic integrated circuits (PICs) are expected to play a significant role in the ongoing second quantum revolution, thanks to their stability and scalability.

Article Content

2026 Schedule | OFC

S1D | N2: Optics and Photonics for Data Center and Computing Applications
Workshop: Chasing the Limit: On the Path to Photonic Scale-Up with Ultra-Low-Energy/Bit

Low-loss High-uniformity Silicon Nitride Optical Building Blocks ...

Abstract: We introduce low optical loss and highly uniform passive silicon nitride optical building blocks including straight waveguides, bends, tapers, 1-by-2 MMI, silicon nitride-to-silicon

New tech builds ultralow-loss integrated photonic circuits

Now, scientists in the group of Professor Tobias J. Kippenberg at EPFL's School of Basic Sciences have developed a new technology for building

Low-loss amorphous silicon-on-insulator technology for photonic ...

This clearly proves the feasibility of employing low-loss, low deposition temperature amorphous silicon for realizing photonic circuit in a single and multilayer waveguide circuits or adding

Photonics assembly and testing – From Lab to Fab –

ficonTEC Home. Manufacturer of automated micro-assembly and testing solutions for the photonics industry. From Lab to Fab.

Optimized low-loss integrated photonics silicon-nitride Y-branch ...

We have designed a compact and low-loss Y-branch integrated photonic element for silicon-nitride waveguide.

Ultra-Low-Loss Silicon Nitride Photonics Based on Deposited Films ...

The fabrication processes of silicon nitride (Si_3N_4) photonic devices used in foundries require low temperature deposition, which typically leads to high propagation losses.

Materials Science & Chemical Manufacturing | Dow Inc.

Dow is a materials science company that offers a wide range of products and services, including agricultural films, construction materials, and medical

Deep-Dive Equity Research: The Hidden Micro-Cap Bottleneck in AI ...

The market is pricing in the dilution risk and cash burn, completely ignoring the strategic value of their UPD tech and the recent Silicon Valley validation of the ODRA system. If you believe

Supporting quantum technologies with an ultralow-loss silicon

His research focuses on the micron-scale silicon waveguides that are used to make ultracompact and low-loss photonic integrated circuits for communication, imaging, and sensing applications at infrared

Photonic Integrated Circuit Solutions | Defense Electronics

In addition to silicon photonics, Basom Hunter has expertise in two secondary photonic platforms: fully active Indium-Phosphide and passive ultra-low loss Silicon Nitride. Indium Phosphide PICs are

2026 Semiconductor Industry Outlook | Deloitte Insights

Deloitte's 2026 global semiconductor industry outlook seeks to identify the strategic issues and opportunities for semiconductor companies and other parts of the

Towards fibre-like loss for photonic integration from

Here we present an ultralow-loss PIC platform based on germano-silicate—the material underlying the extraordinary performance of optical

High-Q Ring Resonators in Low-Loss Monolithic Barium Titanate on Silicon

Summary We investigate loss mechanisms in monolithic photonic structures fabricated from barium titanate (BTO) grown epitaxially by RF-sputtering on silicon-on-insulator substrates. Record values

Ultralow-Loss Silicon Photonics beyond the Singlemode Regime

The concept of silicon photonics beyond the singlemode regime helps solve the issue of high propagation loss significantly. In particular, it enables silicon photonic devices with enhanced

Tower Semiconductor Releases 300mm Silicon Photonics Process as

The unique 300mm offering features best-in-class silicon waveguides and the most advanced low-loss silicon nitride waveguide offerings in the industry. The larger wafer size enhances

Global Leader in Materials, Networking, and Lasers

Learn how Coherent empowers innovations and breakthrough technologies for the industrial, communications, electronics, and instrumentation markets.

PhD. Student position in Integrated photonic-spintronic devices ...

Leveraging an integrated photonic platform with ultra-low loss and high optical nonlinearity, you'll help develop compact, efficient sources of pulsed and continuous-wave terahertz radiation.

How Intel Foundry Packaging Technologies Redefine AI

AI and HPC systems are pushing packaging technologies to their limits. At ECTC 2026, Intel Foundry engineers and collaborators shared research

Supporting quantum technologies with an ultra-low-loss silicon ...

Photonic integrated circuits (PICs) are expected to play a significant role in the ongoing second quantum revolution, thanks to their stability and scalability. Still, major upgrades are needed for available PIC

Co-Designed Silicon Photonics Chip I/O for Energy-Efficient Petascale ...

Optical interconnects leveraging low-loss fibers have been recognized as a promising solution to provide uniformly high-bandwidth communications across a wide range of link distances . To eliminate

#photonics #opticalcommunications #siliconphotonics # ...

Everyone is talking about AI chips. But there's another technology quietly powering the AI era: Photonics. When we think about digital technology, we often imagine electricity carrying information ...

Integrating silicon photonics with complementary metal-oxide ...

Complementary metal-oxide-semiconductor-integrated silicon photonics offers a scalable path to high-bandwidth, low-energy optical interconnects for data centres and artificial intelligence ...

Product Expansion and Prospect of Huarui High Photonics ...

We realize localized substitution for 1G/10G/25G optical and electric chips, and carry out pre-research on next-gen low-power tech including silicon photonics, LPO and CPO to solve high power ...

Menlo Micro Introduces MM5800 Millimeter-Wave Switching Platform

By delivering high reliability, ultra-low loss, and broadband performance in a manufacturable platform, the MM5800 unlocks new system architectures across RF communications, silicon photonics ...

Home | Hamamatsu Photonics

The official website of Hamamatsu Corporation whose mission is to advance science and industry through photonic technologies. Our products include optical sensors
