

Manufacturer of plastic reels for fiber optic cables

AI Overview

Leading manufacturers of plastic reels for fiber optic cables include Sonoco, Optical Cable Corporation (OCC), Narco, and Reel Options, offering customizable, durable, and precision-engineered solutions.

Key Manufacturers and Offerings

Sonoco is a major global manufacturer of high-quality reels and spools, including plastic reels specifically for the optical fiber and fiber ribbon industry. Their products are designed with extremely precise tolerances, up to 1/100th of a millimeter, and are developed in close cooperation with OEMs to meet industry demands. Sonoco Plastics in the Netherlands specializes in high-performance reels suitable for fiber optic applications.

Optical Cable Corporation (OCC) offers the Modular Advanced Reel System (MARS®), a lightweight, modular reel system made from impact-modified polymer. These reels are ideal for harsh-environment fiber optic installations and provide versatile deployment options, including backpacks, shipping cases, and cable acquisition platforms. The MARS system is designed for quick deployment, efficient storage, and easy transport.

Narco manufactures a wide range of custom plastic and wooden reels for fiber optic cables, with diameters ranging from 3 to 96 inches. Their ABS plastic reels provide moisture resistance, color options, and secure handling for delicate fiber optic cables. Narco also offers custom sizing, stenciling for company logos, and export-ready packaging.

Reel Options produces Enviromold® plastic reels and other molded spools suitable for fiber optic cables. Their product line includes ICON Reels, DEADBOLT® Reels, and 3FLANGE Reels, all customizable in flange and core diameters. These reels are designed for both manual and automated winding equipment, with options for adjustable payout tension and ready-to-use end-stand systems.

Considerations for Choosing Plastic Reels
