

NS-6000 Optical Time Domain Reflectometer

Overview

As the latest upgraded fiber optic tester, the nordson ns-6000 and ns-8000 optical time domain reflectometers (otdrs) continue the series' legacy of high precision and robust durability. The first use of the battery needs to be depleted, and then charging the battery, the first charging time should be no less than 10 hours. Battery charging temperature range is $0^{\circ}\text{C} \sim 50^{\circ}\text{C}$. Their advantages, including high accuracy, large screen display, and multi-mode compatibility, make optical fiber communication. 8 inch color touch screen, button/ touch dual operation; Internal integration of eight major functional modules, multi-functional integration to help customers effectively solve the field test and maintenance; The highest 45 dB dynamic range, can penetrate optical splitter. NK6000 multi-functional OTDR adopts 5.
