

Network Cabinet Unit

Overview

A network cabinet is an enclosed rack cabinet used to organize, protect, and manage switches, routers, patch panels, PDUs, cables, and other network equipment. When choosing one, the key is to confirm rack units, cabinet depth, airflow, cable space, and future expansion. For office networks. Intellinet network cabinets and racks provide the ideal solution for a secure, structured, and scalable IT infrastructure - whether as floor-standing cabinets or wall-mounted racks for network and server applications. Built with best-in-class weight load of 3,500 lbs. / 2,500lbs rolling load, doors with maximum air flow of 80%, FlexFusion can tackle. Network cabinets for communication electronics such as telephone systems for Internet telephony and connection technology, patch elements, cables. The letter "U" stands for something called a rack unit. 45 millimeters, if you prefer.
