

Precision Optical Power Meter Equipment Model

Overview

The Precision Rated Optics PM-102B Optical Power Meter is a versatile and accurate tool designed for measuring optical power levels in fiber optic networks. This optical power meter can convert an optical signal into a voltage signal in high resolution and with an extremely high bandwidth. Note that Newport and ILX Lightwave products are not cross-compatible. [Measurement items] Optical insertion loss Looking for more information on our people, technology and solutions?

All of EXFO's modular (IQS line) and benchtop power meters are built for top performance and pinpoint accuracy, and the various models offer a mixture of features and specifications to suit various test setups. All modules are compatible with Dimension ALPHA and OMEGA universal optical test platforms.
