

Price of 4-core optical fiber cable connection splitter

AI Overview

The price of a 4-core optical fiber cable connection splitter typically ranges from \$15 to \$40, depending on the brand, type, and included accessories.

Pricing Overview

Amazon Germany lists a 4-core FTTH fiber distribution box with 4 connectors and fusion splice capability, suitable for indoor and outdoor use, priced around €25–€35 depending on shipping and seller options. Amazon US offers a similar 4-port fiber distribution box with SC APC coupler adapters and a fusion splice tray, priced approximately \$20–\$30. Specialized fiber optic suppliers such as mefiberoptic.com and topfiberbox.com provide 4-core IP-55 rated distribution boxes with PLC splitters, wall-mount options, and protective enclosures, with prices ranging from \$18 to \$40 depending on specifications and included splice trays. PLC splitters alone (4x SC/UPC) for branch distribution of optical signals are available for around \$15–\$25, supplied pre-assembled with a measuring protocol and no power supply required.

Key Considerations

Type of splitter: PLC splitters are passive and commonly used for even signal distribution.

Enclosure: Weatherproof or IP-rated boxes are suitable for outdoor installations, while standard plastic boxes are sufficient for indoor use.

Accessories: Some boxes include fusion splice trays, adapters, and pigtails, which can affect the price.

Installation: Wall-mount or pole-mount options may influence cost and convenience.

In summary, for a 4-core optical fiber splitter with distribution box, you can expect to pay \$15–\$40 depending on the configuration, brand, and additional features. For precise pricing, check the latest listings on Amazon or specialized fiber optic suppliers.
