

Price of Trapezoidal Vertical Cable Tray Elbows

AI Overview

Trapezoidal vertical cable tray elbows are available starting around \$1.30 per piece for bulk orders, with prices varying based on material, size, and customization options.

Pricing Overview

Bulk Pricing: On platforms like Alibaba, cable tray elbows can be purchased in bulk for approximately \$1.30 each, with options in galvanized steel or stainless steel suitable for industrial use.

Supplier Variations: Suppliers such as G-STEEL TRADING offer vertical elbows in 45° and 90° angles, with widths ranging from 50 mm to 800 mm and heights of 50 mm or 100 mm, with customization available.

Material Options: Common materials include galvanized steel, stainless steel, aluminum alloy, and FRP (fiberglass-reinforced plastic), which can affect pricing.

Customization: Many suppliers provide custom fabrication for specific project requirements, which may increase the cost depending on dimensions, coating, or special finishes.

Additional Considerations

Project Scale: Prices are generally lower for bulk purchases and higher for single or small-quantity orders.

Compliance and Standards: Ensure the elbows meet relevant standards such as DIN EN 61537 for safety and durability.

Installation Needs: Vertical elbows are used to navigate changes in elevation within cable tray systems, so selecting the correct angle and size is crucial for efficient cable routing.

For precise pricing, it is recommended to contact suppliers directly with your specifications, including material, width, height, and quantity, as prices can vary based on these factors.
