

Price of low-voltage cable trays manufactured in Indonesia

AI Overview

Low voltage cable trays in Indonesia typically range from IDR 150,000 to IDR 1,500,000 per unit depending on type, size, and material.

Overview of Cable Tray Types and Prices

Perforated Cable Trays Made of steel with ventilation holes to dissipate heat. Common sizes: L800 x T50 x P3000 mm. Price range: approximately IDR 150,000 to IDR 500,000 per tray, excluding VAT for standard sizes.

Ladder Cable Trays Constructed with two side rails connected by crossbars, ideal for heavy-duty cable support. Suitable for indoor and outdoor installations; outdoor versions often use hot-dip galvanizing. Price range: IDR 400,000 to IDR 1,200,000 depending on width, thickness, and finish.

Wiremesh / Cable Basket Trays Made from steel wire mesh, also called Cable Cage or BPC. Lightweight and flexible, suitable for data and electrical cables. Price range: IDR 200,000 to IDR 800,000 per 3-meter section.

Duct / Solid Cable Trays Fully enclosed trays for outdoor or high-protection applications. Price varies based on material and size, typically IDR 500,000 to IDR 1,500,000 per unit.

Factors Affecting Price

Material: Galvanized steel, stainless steel, or electroplated steel.

Size and Length: Standard lengths are 2–3 meters; wider or thicker trays cost more.

Finish: Hot-dip galvanizing for outdoor use increases cost.

Accessories: Elbows, connectors, and mounting brackets may add to total cost.

Supplier and Location: Prices vary between distributors like Trayindo, Siventra, and online marketplaces such as Tokopedia.

Purchasing Tips

Check if the price includes VAT and shipping. Compare online marketplaces and official distributors for bulk discounts. Consult suppliers for custom sizes or project-specific requirements to get accurate quotations. By considering these factors, you can select the appropriate low voltage cable tray type and budget accordingly for installations in Indonesia.
