

Price of polymer cable trays in Kyrgyzstan

AI Overview

Polymer (fiberglass) cable trays in Kyrgyzstan typically range from \$15 to \$50 per meter, depending on size, type, and supplier.

Overview Polymer cable trays, often made from fiberglass-reinforced plastic, are widely used in industrial and commercial electrical installations in Kyrgyzstan due to their corrosion resistance, lightweight nature, and electrical insulation properties. They are available in perforated, ladder, and solid-bottom designs, with prices varying according to tray width, load capacity, and customization.

Price Range Standard perforated polymer trays: Approximately \$15-\$25 per meter for widths up to 200 mm. Larger or heavy-duty trays: Around \$30-\$50 per meter, suitable for high-capacity cable runs or outdoor installations. Custom or specialized trays: Prices may exceed \$50 per meter depending on length, thickness, and additional features like UV resistance or flame retardancy.

Suppliers and Procurement Several local and international suppliers operate in Kyrgyzstan, including Brilltech Engineers, Micro Sheet Crafts, and Cable House, offering polymer cable trays along with installation support and customization. For accurate pricing, it is recommended to contact suppliers directly to request a quote, as prices can fluctuate based on order volume, delivery location, and material specifications.

Additional Considerations Installation and accessories: Supports, brackets, and connectors may add to the total cost. Bulk orders: Often attract discounts, especially for large industrial projects. Compliance: Ensure trays meet local safety and electrical standards for durability and fire resistance. By contacting suppliers directly, you can obtain up-to-date pricing and availability tailored to your project requirements.
