

Price of small-angle elbows for cable trays

AI Overview

Small-angle cable tray elbows typically range from \$10 to \$50 per piece, depending on material, size, and supplier.

Pricing Overview

The cost of small-angle elbows (commonly 45° or 90°) for cable trays varies based on material, size, and finish:

- Galvanized Steel:** \$10–\$25 per elbow, widely used for indoor and outdoor installations due to corrosion resistance.
- Stainless Steel:** \$20–\$50 per elbow, preferred for harsh environments or chemical exposure.
- Aluminum:** \$15–\$35 per elbow, lightweight and corrosion-resistant, suitable for industrial and commercial applications.

Factors Affecting Price

- Angle Type:** 45° elbows are generally slightly cheaper than 90° elbows due to simpler fabrication.
- Tray Compatibility:** Ladder-type, perforated, or solid-bottom trays may require specific elbow designs, influencing cost.
- Customization:** Suppliers often offer custom sizes, coatings, or labeling, which can increase the price.
- Quantity:** Bulk orders usually reduce the per-piece cost, especially from manufacturers like JLH Electric or Alibaba-listed suppliers.

Supplier Options

- Alibaba:** Offers a wide range of customizable elbows in galvanized steel, stainless steel, and aluminum, with ISO-certified quality and global shipping.
- JLH Electric:** Provides standard and custom cable tray fittings, including elbows, with competitive pricing and fabrication options.
- Graybar and McMaster-Carr:** Offer elbows for various tray types, with pricing available upon entering ZIP code for local delivery.

Recommendation

For accurate pricing, it is best to contact suppliers directly with your tray type, elbow angle, material, and quantity. This ensures you receive a quote tailored to your project requirements and location. By considering material, angle, and supplier, you can expect small-angle cable tray elbows to cost roughly \$10–\$50 each, with bulk orders or standard sizes often at the lower end of the range.
