

Red Light Pen Illumination Module

Overview

The Laser Emitter Module incorporates a small red laser diode similar to what you find in a laser pen. You can use this laser emitter to torture your cat, put red dots on the ceiling or combine with a light sensitive receiver to create an optical intrusion alarm or communication link. is a leading provider of advanced telecommunications equipment and network solutions. Based in the dynamic technology hub of Shenzhen, China, we specialize in the design, development, and distribution of high-quality, reliable products that form the backbone. 30 years of experience in R&D and manufacturing - Jilong JILONG launched the VFL-22P pen-type red light pen, which is designed with a metal body, imported laser chips, strong light source, strong penetrating power, and a test distance of up to 25 kilometers. Made of aluminium alloy for classic real Pens. Red light can protect your night vision NO DISTURBANCE: 2 X Red. Vintage 1995 Beamshot Laser Pointer 4mW 630-680 nm, Tested & Working.
