

# Single-port fiber optic panels are sold directly by the company

## AI Overview

Yes, single-port fiber optic panels can be purchased directly from manufacturers such as Connectix Cabling Systems, FiberTek, and CommScope. Direct Purchase Options Many fiber optic panel manufacturers offer direct sales to customers. For example, Connectix Cabling Systems provides SC/APC singlemode fiber optic patch panels that are fully loaded and include internal splice management kits, and they can be purchased directly from the company website. FiberTek also sells fiber patch panels, including DIN rail and rack-mounted options, directly to customers, along with related fiber optic products like cables and adapters. CommScope offers modular fiber panels and cassettes suitable for enterprise and telecom networks, which can be acquired through direct company channels.

**Product Features** Single-port fiber optic panels typically include:

- Rack-mountable designs (1U, 2U, 3U) for data centers and telecom cabinets.
- Pre-loaded adapters (SC/APC, LC, ST, or MPO) for immediate deployment.
- Splice management kits to organize and protect fiber splices.
- Customizable labeling and mounting brackets for easier installation.
- High-density options for efficient use of rack space, such as angled panels for cross-connects.

**Advantages of Direct Purchase** Buying directly from the manufacturer ensures:

- Access to the latest models and configurations.
- Customization options, such as color, labeling, or adapter type.
- Technical support and warranty coverage directly from the company.
- Bulk or pre-loaded panel options for faster deployment.

**How to Purchase** To buy single-port fiber optic panels directly:

- Visit the manufacturer's website (e.g., Connectix Cabling Systems, FiberTek, CommScope).
- Select the desired panel type and configuration.
- Contact the company for pricing, availability, and shipping options.

Some companies may offer online ordering, while others require direct inquiries.
