

Standard Price for Wiring in Household Distribution Boxes

AI Overview

Residential distribution box wiring typically costs between \$120 and \$1,600 depending on box type, wiring complexity, and labor, with materials ranging from \$25 to \$600.

Cost Breakdown

Materials:

- Standard single-gang or 4-inch metal boxes: \$25–\$60
- Multi-gang or deep boxes with surge protection: \$200–\$600

Plastic boxes are cheaper but may require additional fittings.

Distribution boards with MCBs, RCCBs, and bus bars for typical residential setups: \$150–\$500 depending on capacity and number of circuits.

Labor:

- Hourly rates typically range from \$60–\$125 per hour.
- Simple installations (single box, accessible location): 2–3 hours, costing \$120–\$260.
- Complex setups (new circuits, multiple sub-circuits, difficult access): \$800–\$1,600, with high-end projects exceeding \$3,000.

Installation Considerations:

- Number of circuits:** More circuits increase both material and labor costs.
- Wiring type:** Standard 120–240V wiring for power circuits; low-voltage wiring (12–48V) for communication, security, or smart home systems may add \$50–\$150 per run.
- Accessibility:** Concrete walls, multi-story homes, or long cable runs can increase labor by 15–30%.
- Safety features:** AFCI/GFCI protection adds \$150–\$300 per box.
- Compliance:** Permits and code adherence may add \$50–\$150 depending on local regulations.

Example Residential Setup

A typical single-phase 60A distribution board powering:

- 5 lighting sub-circuits
- 2 socket outlet circuits (13A)
- 1 AC unit circuit (16A)

Wiring requirements:

- Main feeder cable: 16mm² for phase and neutral
- Sub-circuits wired prior to DB installation
- MCBs and RCCBs installed according to standard regulations

Estimated Cost:

- Materials:** \$250–\$450
- Labor:** \$300–\$600
- Total:** \$550–\$1,050 for a standard residential setup, excluding permits and optional features.

Key Factors Affecting Price

- Box type and size – Larger or multi-gang boxes increase material costs.
- Number of circuits – More circuit...
