

Waterproof distribution box for barrier gate

AI Overview

IP65-IP68 waterproof distribution boxes protect barrier gate electronics from water, dust, and UV exposure while supporting clean wiring and DIN rail mounting. Key Features

Ingress Protection: Look for boxes rated IP65 or higher, which ensures protection against dust and water jets, suitable for outdoor barrier gate installations (SinoBreaker, ZCEBOX, EKDB10) .

Material: Durable ABS or polycarbonate plastics are lightweight, UV-stabilized, and resistant to mechanical impact, while some models offer metal enclosures for added security (EliteGates) .

DIN Rail Compatibility: Many waterproof boxes include DIN rail mounting options, allowing easy installation of relays, control boards, and terminal blocks for barrier gate systems (SinoBreaker, EKDB10) .

Size and Configuration: Options range from compact AT series for tight spaces to HT series with extra internal room for multiple terminals or small DIN rail setups. EKDB10 boxes offer 4-39 ways and single, double, or triple layers for flexible wiring layouts .

Environmental Resistance: UV-stabilized housings and compression gaskets maintain sealing even after repeated openings, ensuring long-term outdoor reliability .

Security and Accessibility: Hinged doors, locking mechanisms, and gasket seals protect sensitive electronics from tampering while maintaining clean wire routing (EliteGates) .

Applications

Barrier gates and access control systems: Protects control boards, relays, and power supplies from rain, dust, and UV exposure.

Industrial and commercial installations: Suitable for pumps, lighting, and solar systems.

Photovoltaic systems: Multi-layer boxes allow separation of circuits and safe wiring.

Recommendations

Choose IP65 or higher for outdoor barrier gates. **Select material based on environmental exposure:** polycarbonate for UV resistance, metal for added security. **Consider internal layout:** DIN rail compatibility and sufficient spa...
